

# 08 City of Redmond, Downtown Circulation Options

## Bear Creek ByPass

Changes from existing

Redmond Way and Cleveland Street become two-way streets with one through lane in each direction. Bear Creek Parkway is widened to four lanes. NE 76<sup>th</sup> Street is connected to Redmond Way.

10

### Opportunities

Diverts through traffic from old downtown

Potential for "Main Street" Environment on Redmond Way and Cleveland Street

Increase in on-street parking on Redmond Way

Flexibility of two-way access on Redmond Way and Cleveland Street

Does not use BNSF right of way

Clarity of single through route

### Challenges

Requires new connections on each end.

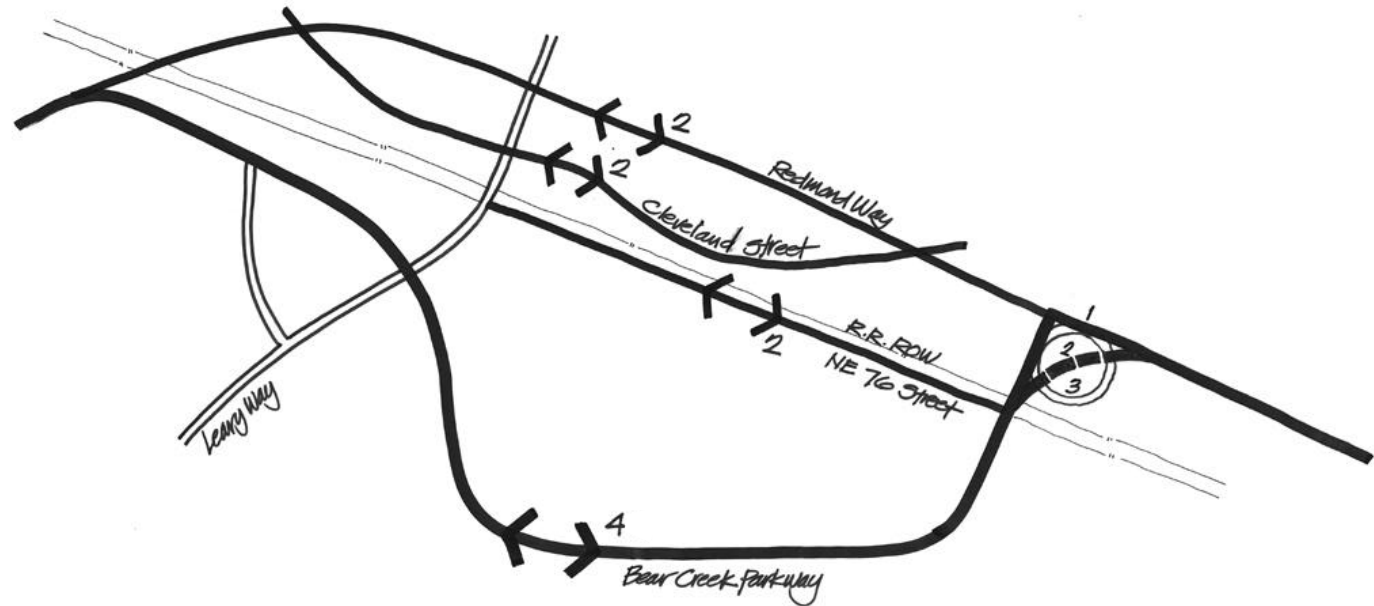

Traffic from north must use lower capacity streets

Widening of Bear Creek Parkway (environmental)

Connection through Heron Rookery

Property acquisition required

Description: All streets become two-way with Bear Creek Parkway as focus of through traffic. Redmond Way and Cleveland Street as local access emphasis.
